ORACLE® Consulting

Whether you're looking to undertake a large transformation to Oracle Cloud / On Premise or looking to migrate an Oracle application or workload, build a new app or integrate with an Oracle Cloud Application, we've got it covered.

Here are just some of the ways in which we are helping our customers to gain and retain the advantage…

We are doing all of these as part of Oracle Partner community, collaborating in each project with our best partners, complementing our resources and skills.

Large Scale Transformations

We offer services aimed at guiding customers who are looking to replace data centers or undertake business transformation.

Solution Implementation

We assist businesses implementing modern solutions. For example, building a mobile app solutions, configuring new analytics dashboards or implementing a customer-facing digital assistant.

Application & Workload Migration

We support many customers with migrating both their Oracle and non-Oracle applications and workloads into the Oracle Cloud and Exa Systems.

Expert Guidance

We offer years of knowledge & experience delivering Oracle Cloud / On Premise Solutions in addition to strong relationships with our Oracle Product Development teams. We continuously train and certify all of our consultants & staff in Oracle Cloud Infrastructure (OCI), Software Security Assurance and associated products. Our specialists are always on-hand to help.

Evolve Your Cloud and On Premise Solution

We offer post-implementation services designed to ensure you continuously improve and extract maximum business value & innovation from your investment in Oracle. Our Evolve offering also includes cloud solution and infrastructure services to reassure you with stability.

Migrate Applications & Workloads to the Cloud or On Premise upgraded platforms

Helping businesses to move applications & workloads to the Oracle cloud

Oracle Consulting provide services helping customers who are looking to undertake tactical transitions to the Cloud, including database migrations and moving large workloads. Our services include migration planning and governance, and a migration Center of Excellence and factory (including a robust framework, method and accelerators). We have over 600 OCI-certified experts and architects to assist you.
