Unlock the value of your ERP Data With Oracle Integration Cloud

Freddy Darmawan

OCI Solutions Director, App Integration

Oracle JAPAC

Scenario

Looking to:

- Integrate end-to-end process
- Accelerate business operations automation
- Integrate SaaS applications
- Extend business services via digital channels

Outcomes

- Streamline business operations with connected processes
- Open end-to-end processes as services via digital channels and enhance user experience
- Simplify hybrid integration and accelerate integration projects

Unlock the value of your ERP Data with Oracle Integration Cloud

If you revisit this session on-demand or have a question later, send us an email at cloudbyte_ww@oracle.com

80%

of companies plan to
accelerate their
companies' digital
transformations.

BCG - 2020

“Integration work accounts for

50%

of the time and cost of
building a digital platform”.

“**Integration as Usual**” and
“**Silos as a Service**” are not
good enough for phased
modernization and digital
transformation.

Gartner - 2020

Challenges faced by ERP stakeholder today

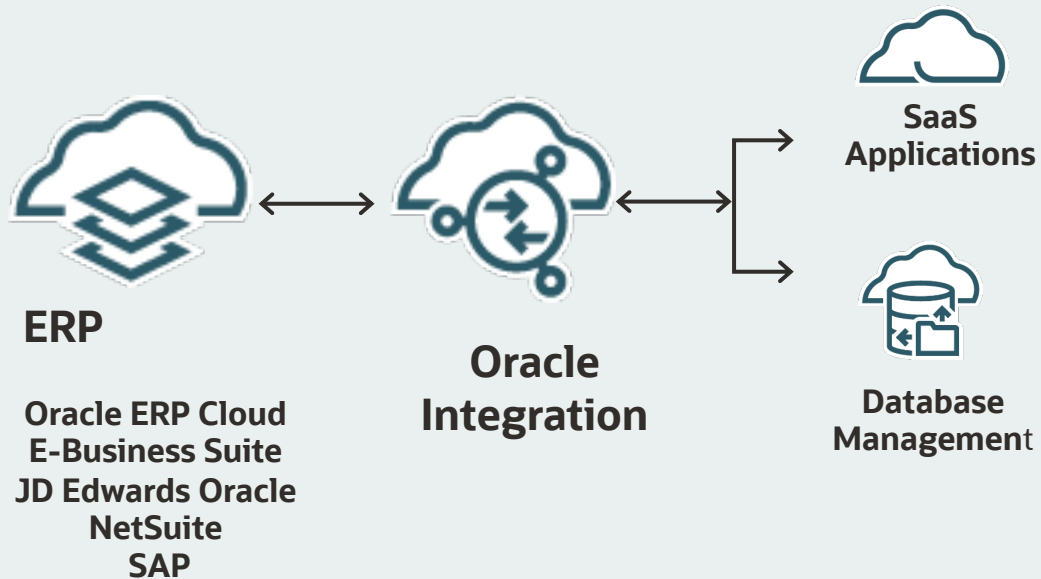

- We need to **consolidate and connect** our SaaS and on-premises **order entry systems**.
- Our **supply chain** is connected by email and **needs to be integrated**.
- We need **visibility** into orders **throughout the process lifecycle**.
- We need to **modernize our ERP** but we do not want to rip and replace existing on-premise investments

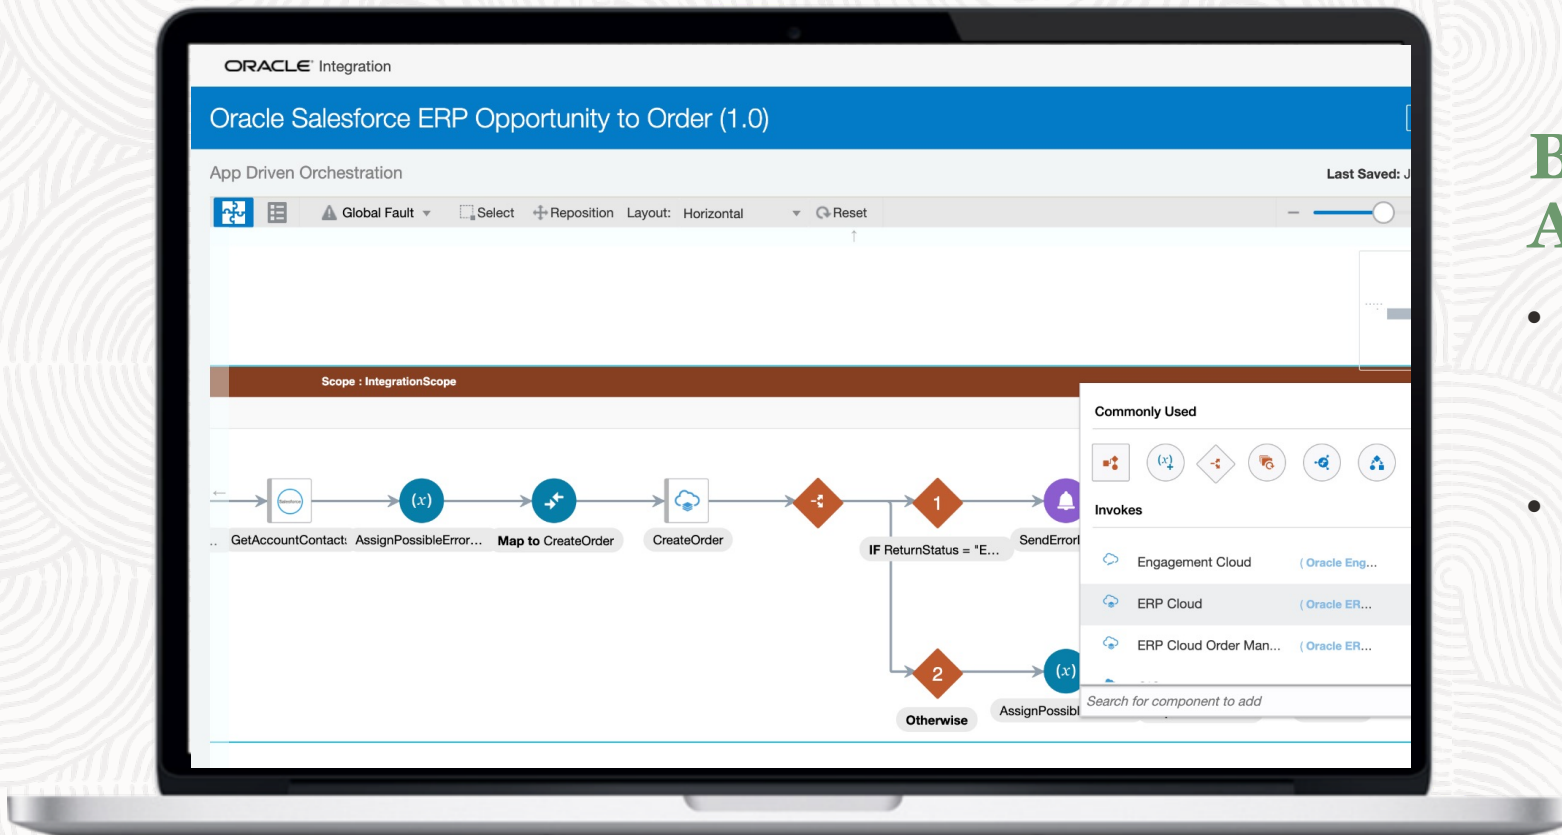

Empower digital transformation with Oracle Integration Cloud

Key Benefits

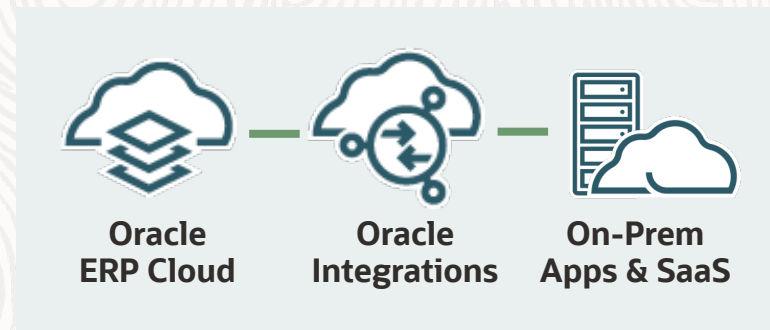

1. Rapid Application Integration
2. Optimize Business Processes
3. Enhance ERP Experience with Visual App Builder

Benefit 1: Rapid Application Integration

- Native integration Oracle Cloud ERP to smooth and simplify connecting applications.
- Provide full view of business process by sharing ERP data with key business applications.

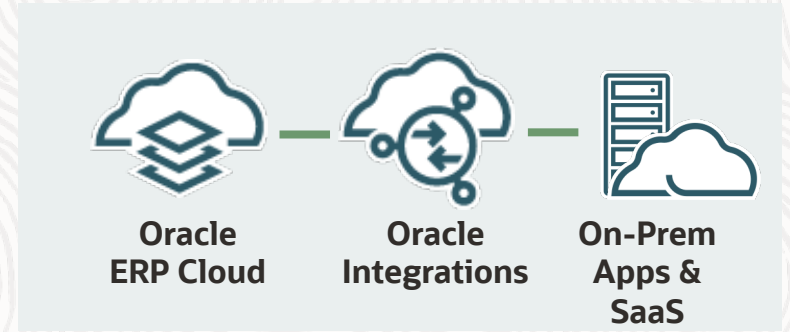

Integrated Oracle ERP Cloud and many on-premises applications with Oracle integration cloud. The smooth integration resulted in **increased flexibility** and **freed up bandwidth** for IT to focus on business priorities.

Rapid Application Integration for ERP

Connect any SaaS with your ERP up to 10X faster

Faster integration with ERP

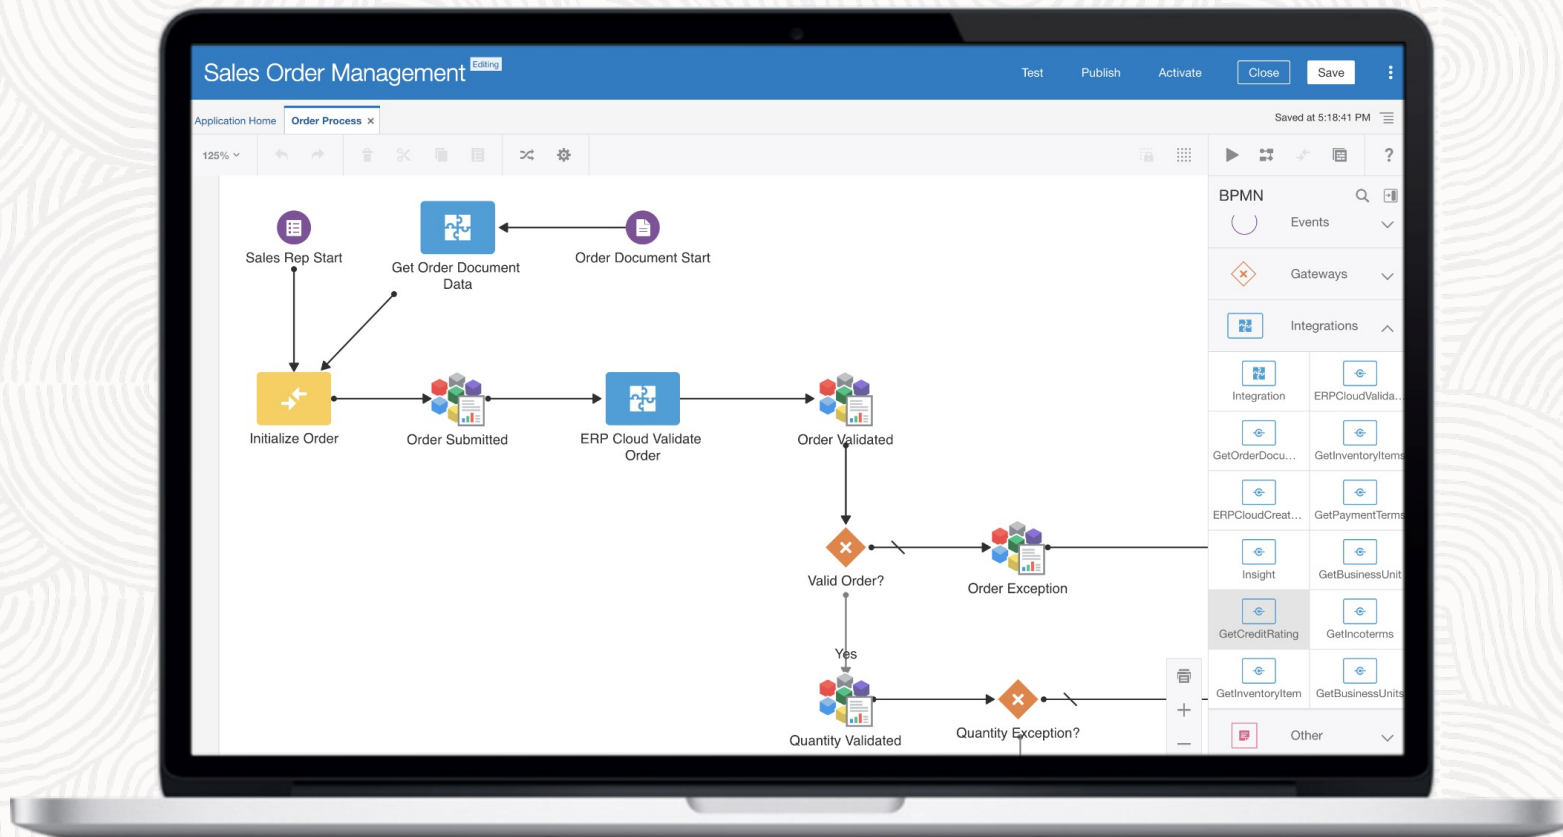

- **Ready made Adapters** for ERP to support any integration type like trigger based, events based and bulk services
- **Native Business Level integration** by converging 100 ERP APIs into friendly view of business objects, service and operations
- **Robust integration** with connection management

Connect ERP with hybrid business application

- **70+ prebuild**, intelligent, wizard driven, enterprise adapters to connect ERP with other Apps and SaaS
- **20+ ready made** integration recipes (templates) to extend ERP with Sales, Service, HR, Order, Inventory and etc.
- **Upgrade with SaaS** reduce the issue of compatibility

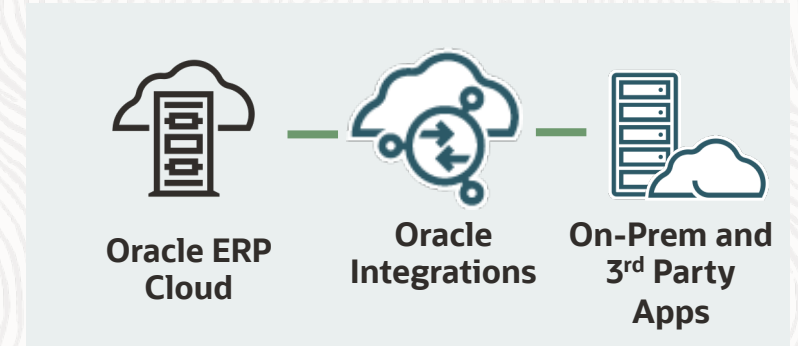

Low Code approach

- **Drag-n-drop** to define integration and mapping
- Reduce up to 60% of developer time with **embedded AI recommendations**
- Support common integration pattern like FTP, **business event** and etc.

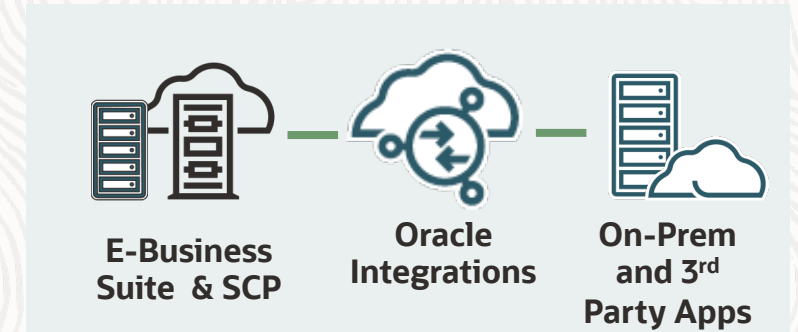

Benefit 2: Optimize Business Processes

- Reduce time to connect people, applications, and digital process across LOBs
- Seamlessly include human approval and exception management into application integration.
- Easily connects with multiple applications for end-to-end visibility and control.

Modernized and optimized **home loan process from origination to funding**. Connected Oracle ERP with third party and on-premises apps using Oracle integration cloud. Achieved 4X faster time to market through reuse of pre-built components and **end to end process automation**.

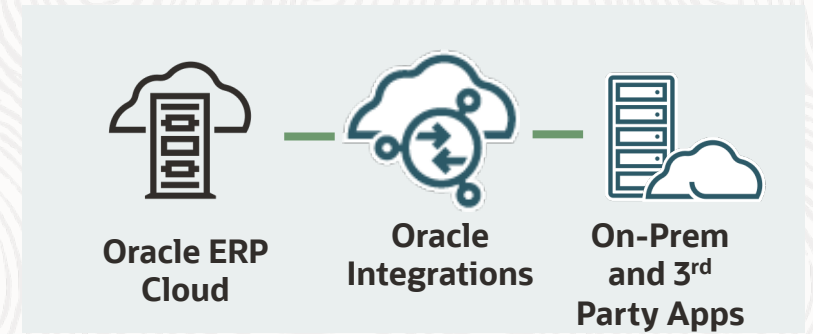

[Read More](#)

Automated **24 corporate business workflows** to Oracle Cloud, mostly focusing on improving Procure-to-pay cycles and employee workflows for **20K staffs**. These workflows were integrated seamlessly with the existing backbone Oracle ERP, EBS and PSFT.

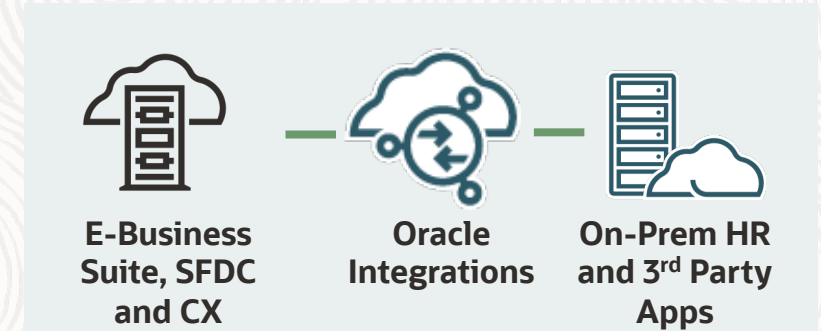

[Read More](#)

Selected Oracle integration to Integrate Oracle ERP Cloud, on-prem applications and digitized end-to-end process automation for employees & suppliers services. **Optimized the approval process from weeks to days.**

Calix is **using pre-built templates from Oracle Integration to speed time to business value** by connecting and extending SaaS and on-premises HR, CX and ERP applications.

Oracle Integration to Optimize Business Processes

Automate the end-to-end process from ERP to improve efficiency

Digitize end-to-end business processes

ERP Automation

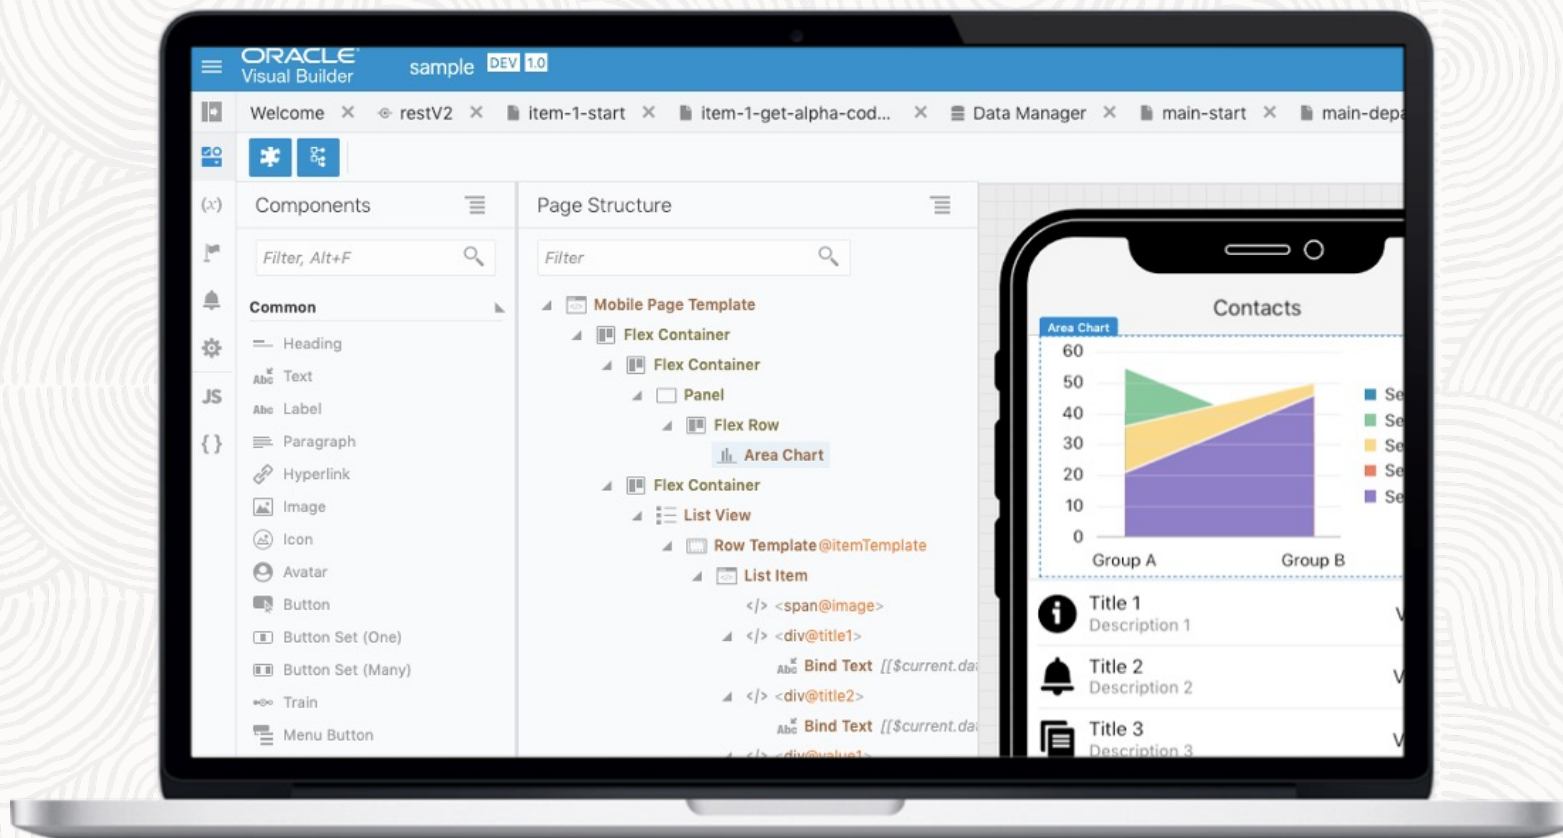

- Loan Origination
- Shipping and handling
- Opportunity to order
- Recruit to hire and others

Rapid Process Modeling with Visual Designer

- **Drag and drop** visual builder interface
- Embeddable **mobile** forms enable seamless UX
- **Prebuilt connections** to ERP to automate process steps in minutes.

Improve your KPIs and SLAs with Process Insight

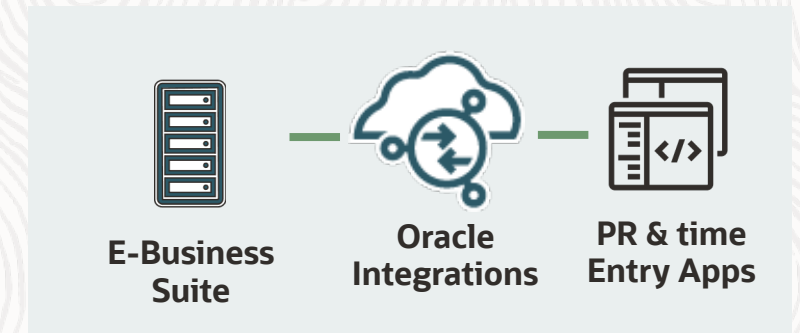

- **Visibility** of the process with KPI tracking
- **Management** reporting to identify the process bottleneck
- Future **process improvement** based on the Process Insight reports

Benefit 3: Enhance ERP Experience with Visual Builder

- Build web/mobile apps in minutes
- Nothing to install or configure, runs in the browser. Applications accessible from any device.
- Drag and drop visual development with live WYSIWYG designer.

Transformed employee experience through UI Modernization. Integrated Oracle EBS and used Visual Builder to simplified PR forms & time entry apps. **Improved employee satisfaction and productivity.**

Oracle
Integrations

Account
Payable

Integrate to ERP Cloud, Visual Builder empowers IT and business users to develop custom extensions. **Improved Accounts Payable efficiency by 60%**

Enhance ERP Experience with Visual Builder

Low Code Platform to extend Capability and Reach in Omni Channel

Easy to use

- **Nothing to install or configure**, runs in the browser
- Intuitive **Drag and drop** visual development with live WYSIWYG designer
- GUI based development with full DevOps support

ERP/SaaS Integrated

- **Discover** Oracle ERP/SaaS business objects
- **Securely** enrich SaaS to fit your business need with custom UI extension to improve customer or employee experience
- Seamless **Single Sign-On** to ensure consistency experience with SaaS

Extensible

- Build Once For Both Android & IOS to support Responsive Web, Mobile and Progress Web Application (PWA)
- **Standard Extend** via JavaScript, REST, HTML, CSS to Cordova to maximize device capabilities like Location, Camera and IOT devices

Demo - Oracle Integration with ERP

Experience:

- Rapid Application Integration
- ERP Process Automation
- Enhance ERP Experience with Low-code Visual Builder

Summary

ONE Platform accelerating three outcomes

Rapid Application Integration

- **Connect** all on-premises and SaaS business applications **4-10X faster.**
- **Prebuilt adapters and recipe** to native ERP integration simplify the technical complexity.

Optimize Business Process

- Digitize and automate your business process across application and service to improve efficiency
- Improve SLAs and KPIs for your long running process with ERP

Enhance ERP Experience

- Extend ERP apps capability with **Low Code to extend the reach to customers, partners and employees**
- Push-button releases to deliver **web and mobile apps in minutes.**

Next Step – Engage with Oracle Cloud Experts

Simple way to engage experts – FREE migration with Oracle Cloud Lift Services

Contact **cloudbyte_ww@oracle.com** to:

1. Organize a **free** technical/business value workshop with your team
2. Discuss specific Integration on OCI use case in your context
3. Engage Oracle Lift Services for **free** integration service to OCI

Oracle Cloud Lift Services

- 2-3 weeks free engagement with experts to integrate and automate your ERP apps
- **Scope**
 - Review production use case
 - Design, configure and provision OIC
 - 1-2 Integration flow and connect to target app
 - Go-Live Support
 - Training

Oracle Consulting Rapid Start implementation service offering

Scope

- Run workshop to:
 - Collect general requirements for integration use cases
 - Identify 2 suitable integration flows (based on complexity of data mapping and activities)
- Setup the Oracle Integration Cloud environments
- Build the identified integration flows into the Oracle Integration Cloud instance and provide support during testing
- Facilitate joint session to share experience, leading practices and plan next steps on Oracle Cloud

Deliverables

- Selected integrations deployed in the dev or test Oracle Integration Cloud instance
- Roadmap for next steps for application integration in Oracle Cloud

Customer Benefits

- Real integration flows in Oracle Integration Cloud allow better understanding of OIC capabilities and value
- Customer specific recommendations for next steps with Oracle Integration cloud

Timeline

- 2 – 3 Weeks

Next Step – Self Service Learning

Hands on Labs & Step-by-Step Guides

ERP Integration On-Demand Webcast

- Deep Dive Technical Update
- Demo on the Adapters, Integration
- Demo on Process Automation
- Demo on ERP Extension with Visual Builder

Experience how it works: Avatar-led integration demo

Oracle Integration Hands-on Lab

- Create an Integration
- Create a Trigger
- Data Mapping
- Activate and Test Integration
